Re: Contract N62470-95-D-6007
Navy CLEAN II, District III
Contract Task Order (CTO) 0219
Draft Remedial Investigation (RI) Report for Operable Unit (OU) 19, Site 84
Marine Corps Base, Camp Lejeune, North Carolina

Dear Mr. Stevens:

I am pleased to submit on behalf of Baker Environmental, Inc. (Baker) one copy of the Draft RI Report for Operable Unit (OU) 19, Site 84. One copy of the report has also been forwarded to Mr. Rick Raines at MCB, Camp Lejeune, two copies to CH2M Hill, and one copy to IT Corporation. Copies of the report have also been distributed to representatives of the U.S. Environmental Protection Agency (EPA – two copies) - Region IV, the North Carolina Department of Environment and Natural Resources (NC DENR – one copy to Superfund Section and one copy to Wilmington Regional Office), and the Naval Environmental Health Center (NEHC).

The RI report includes a brief summary of the proposed recommendations for Site 84. In short, they include proceeding with the non-Time Critical Removal Action (non-TCRA) tentatively scheduled to begin in February 2002 and completion of the Feasibility Study (FS). As demonstrated in the human health risk assessment, completion of the non-TCRA will reduce site risks, leaving the FS to address remaining site contamination.

As you are aware, the EPA has requested that the Final Record of Decision (ROD) for Site 84 be completed in Fiscal Year 2002. To ensure the project meets this aggressive schedule, we would like to receive your comments on the Draft RI by March 15, 2002 (45 business days).

Baker
